New Features in Version 9

InLoox 9 Web App

Successful Projects Start with InLoox

Your daily business, customers, and projects may be a continuous challenge, but with InLoox Web App you've got everything under control. All you need for successful project management is an internet connection and the browser of your choice. Immediately access all your important documents, check on current project progress, and communicate with your team anytime and wherever you are. And best of all: this is possbile without switching programs or media disruptions.

Our online project software bridges the gap between agile and classic project management. It connects all team members and enables collaboration regardless of the device or operating system they are using.

You decide whether to host your data on your own servers or store it in the InLoox cloud. InLoox Web App makes your project data available wherever you are.
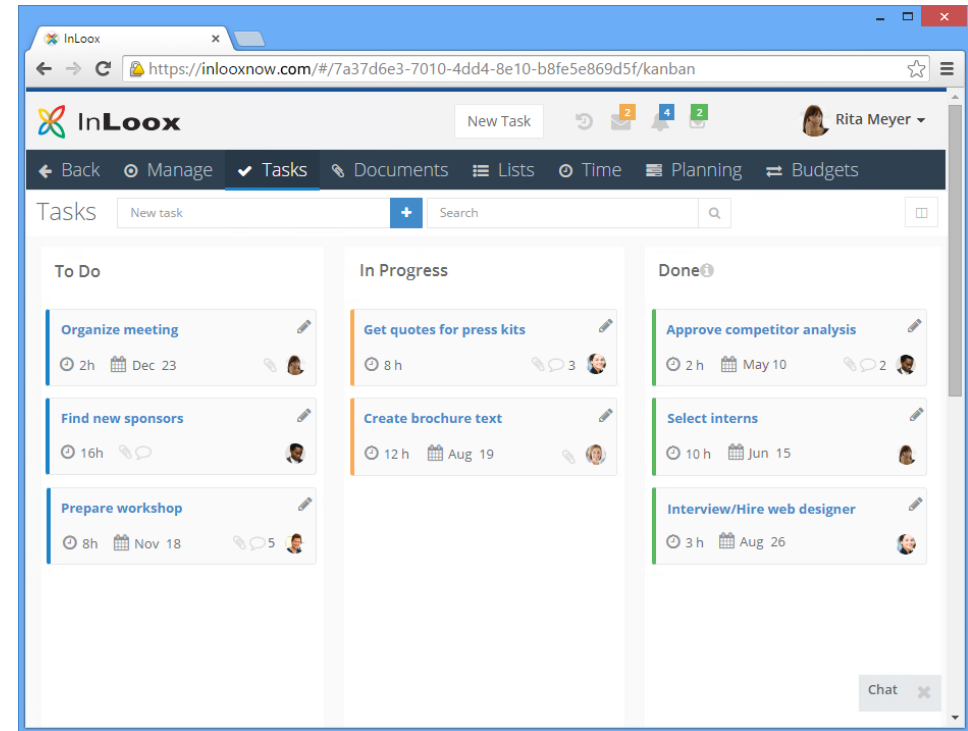

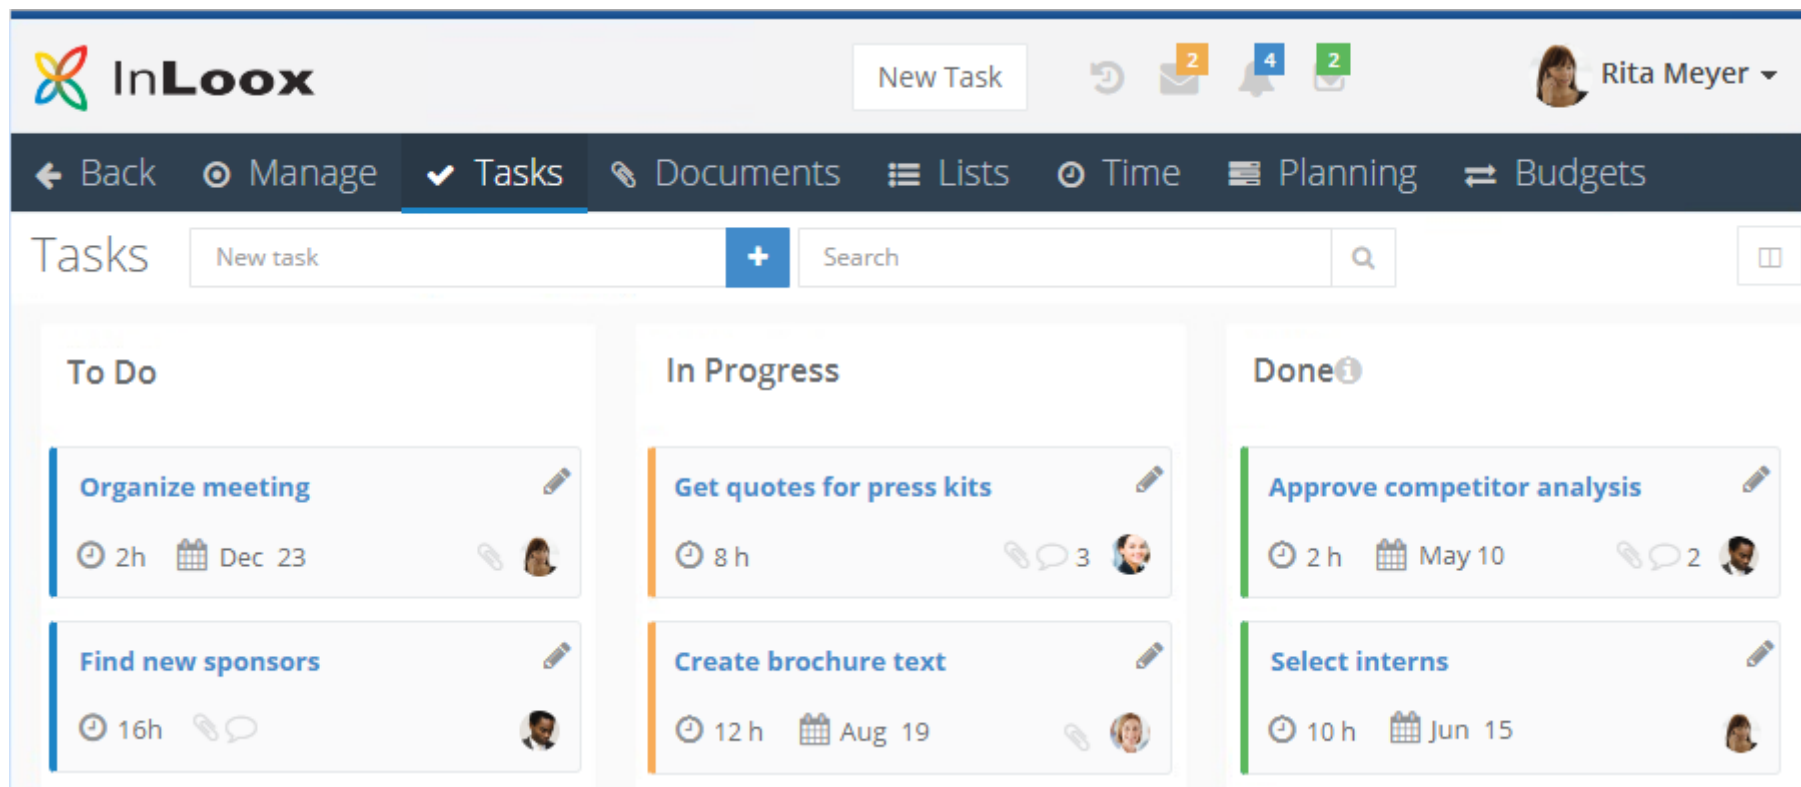

Start your free, full-featured 30-day trial of the latest product generation today. You will be amazed:

Team Collaboration

Kanban

Use the Kanban method to visualize which project tasks are planned, which are being worked on and by whom, and which are already done. InLoox Web App closes the gap between modern task management and classic scheduling as you can easily attach tasks from the Kanban table to an activity in your Gantt plan.

Team Collaboration

Task Management

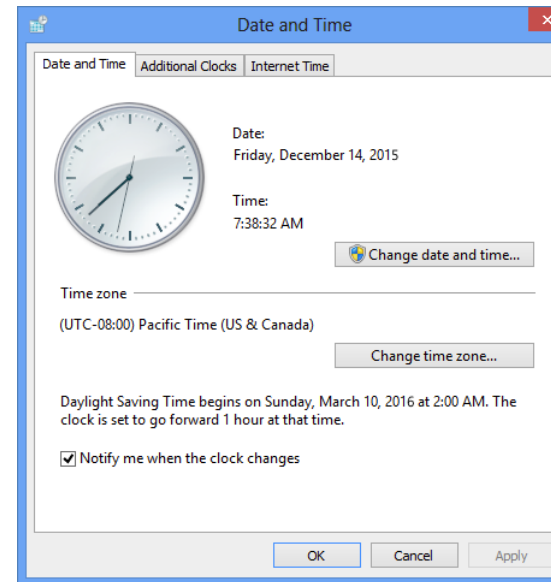

Every team member knows what needs to be done by whom until which due date – this is a decisive factor for project success . With InLoox Web App you easily set, delegate, and organize your tasks with just a few clicks. Best of all: it can be done independently of a project schedule. Automatic notifications ensure that no information about new or due tasks is lost. Ranging from your personal time management to task management within the team, you will always have an overview of what to do next.

Time Zones

Your team is scattered across various time zones yet has to work towards a common deadline? With InLoox 9 Web App, the cumbersome time zone conversion belongs to the past. Now, the time zone set on the device you are working with is referenced and InLoox automatically converts your dead-lines for you.

Team Collaboration

Lists

Set up individual to-do or check lists for your projects and use them for your self-management and project management. Link your lists to various project elements e.g. documents or tasks. You can quickly integrate your classic to-do list into a project and it will never again go missing among your piles on your desk.

Project Communication

Stream

The newly created stream function keeps you always up to date. It alerts you to any incoming notifications, chat messages, new comments to project elements, and references in a concise form – never again miss important project information and updates.
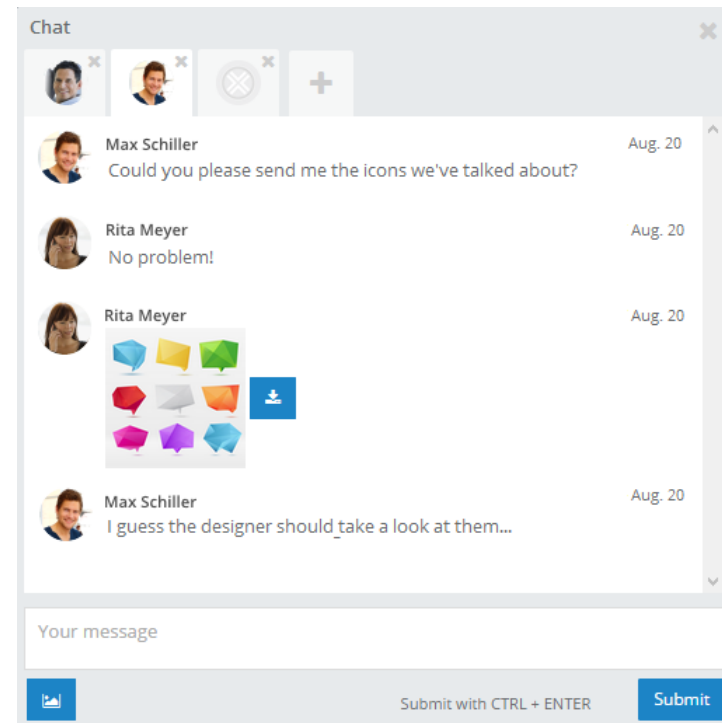

Project Communication

Reminders
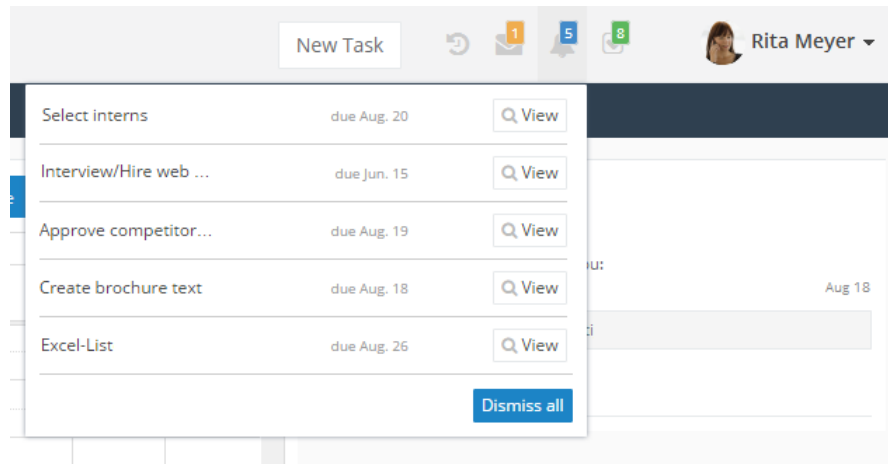

With InLoox Web App you will never again forget about due tasks – if you like, it will remind you. You can set a reminder and always stay on top of important tasks in your project to never miss a deadline again.
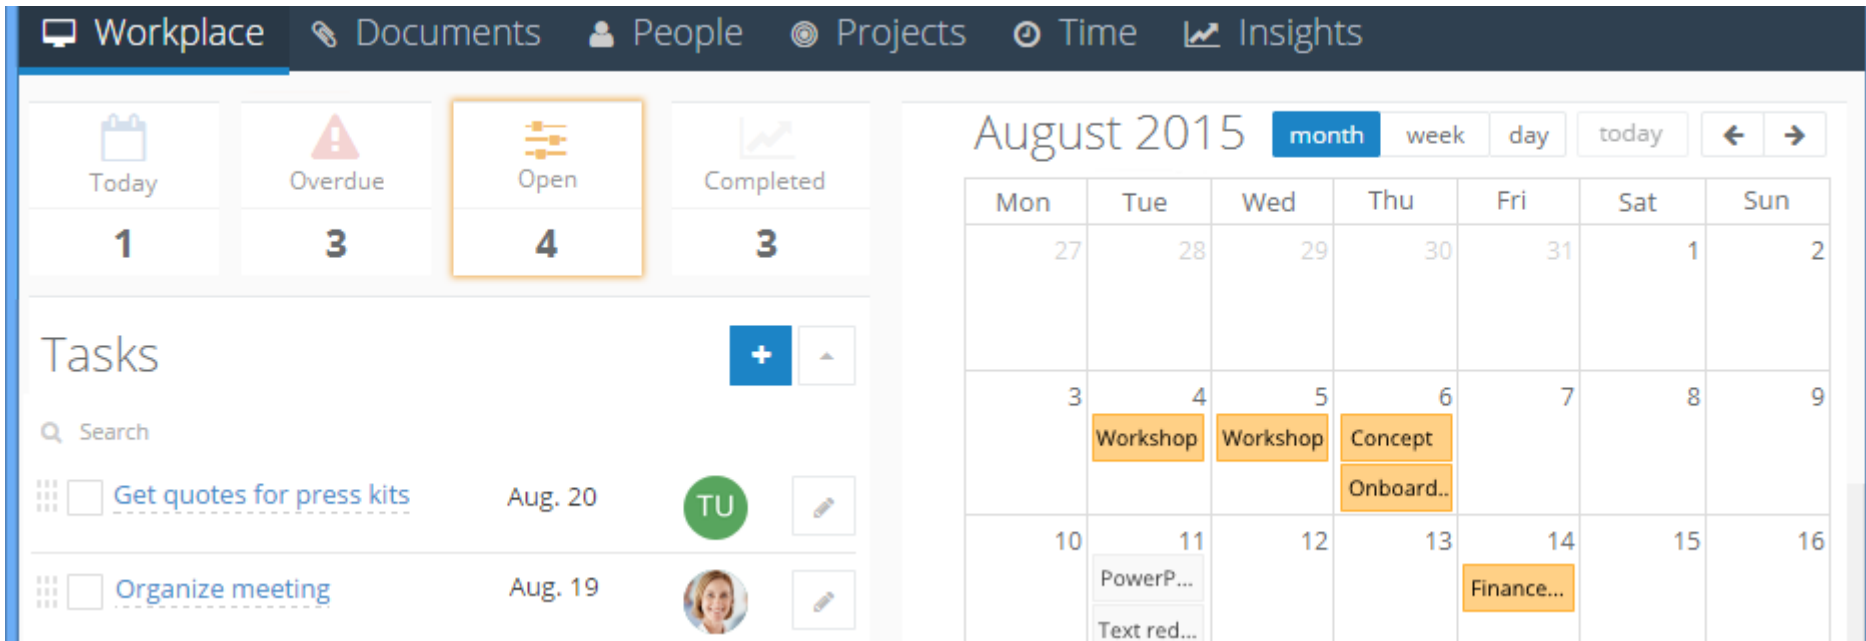

Chat

The newly created chat function makes communicating with your team members and project partners quick and easy. Use @-references and leave comments about project elements and stay in touch with your team, regardless of where you are, to avoid additional meetings, phone calls, or emails.

Overview and Insights

Workplace

The newly developed workplace gives you an overview of today's tasks, newly created tasks and whatever else is happening in your projects. The project calendar helps you organize your day and prioritize your tasks. You can quickly drag and drop your tasks into the calendar. The workplace gives you all the information you need to start your project day well prepared.

Overview and Insights

Insights
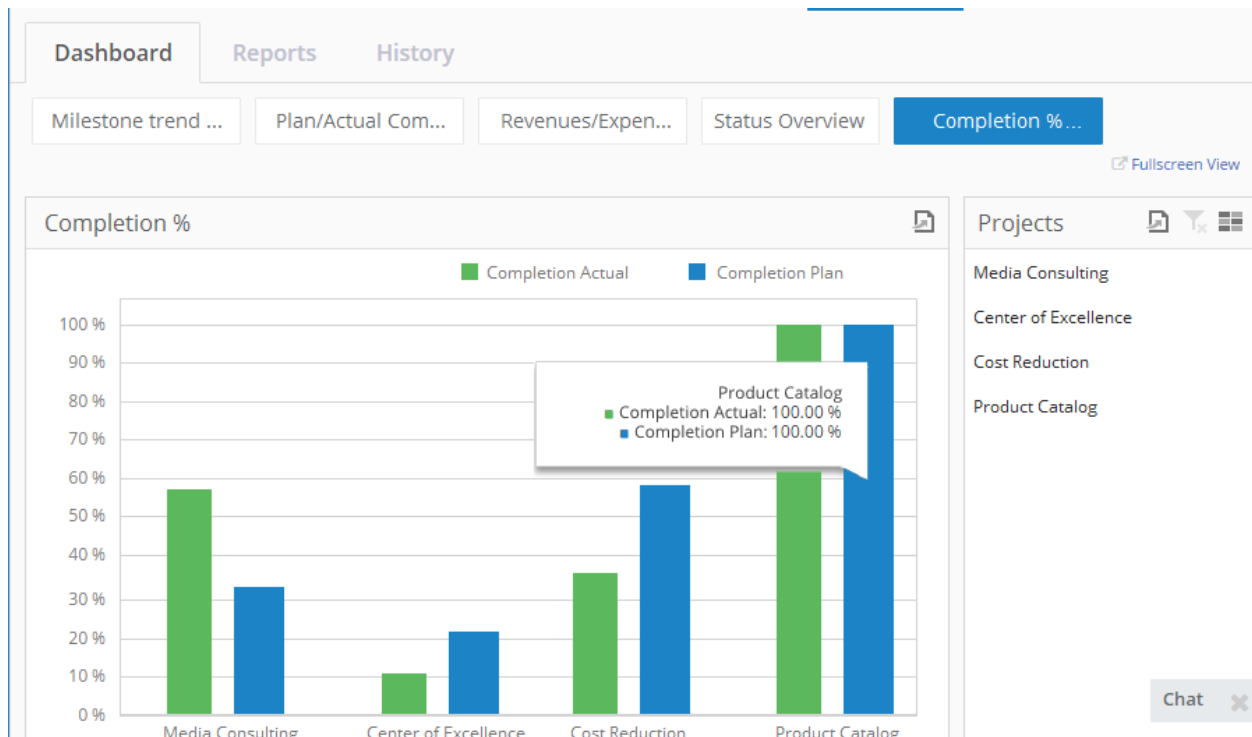

APIs

Make InLoox Web App your central platform. With APIs you can extend the software according to your needs. Connect to systems you are using regularly, e.g. your CRM or invoicing software. Keep all your data in one system and avoid program switches and media disruptions.

Here you gain all the insights of the status quo of your projects and can keep track of all important performance parameters. The new dashboard gives you the most important data and latest developments to keep track of costs, ROI, and due dates of your projects on the web. The progress view lists all important changes chronologically across your projects. With the comprehensive project reports you can easily keep all those team members informed who do not work with InLoox.

Ease-of-use & Flexibility

Accelerate Your Project Work
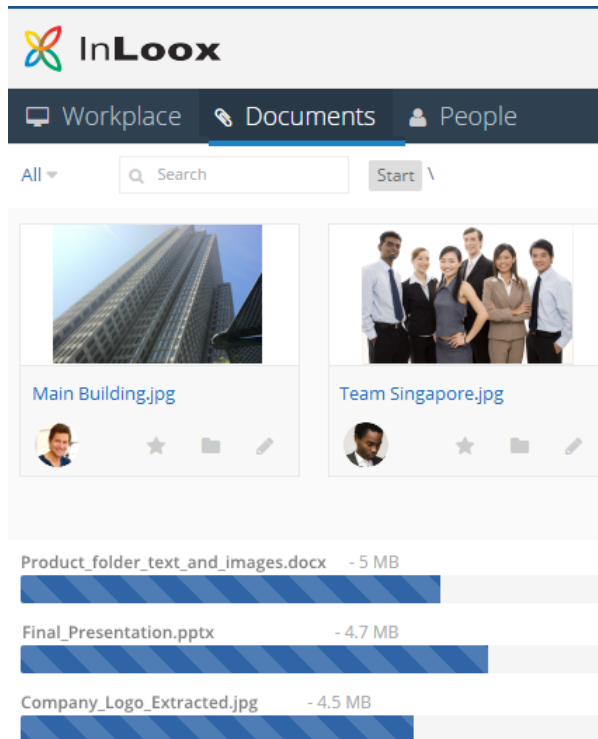

You need a tool that can keep pace with you? We have invested a lot of energy into the development of a software that will make your project work a lot faster – with unmatched loading times, even on the go. Real-time changes are immediately saved and all the information is instantly accessible.

New User Interface

InLoox Web App makes your project work quick and easy: edit project elements directly in the input field and access any linked information with only one click. All changes are saved automatically – nothing gets lost. The intuitive, touch-optimized user interface makes it extremely easy to navigate.
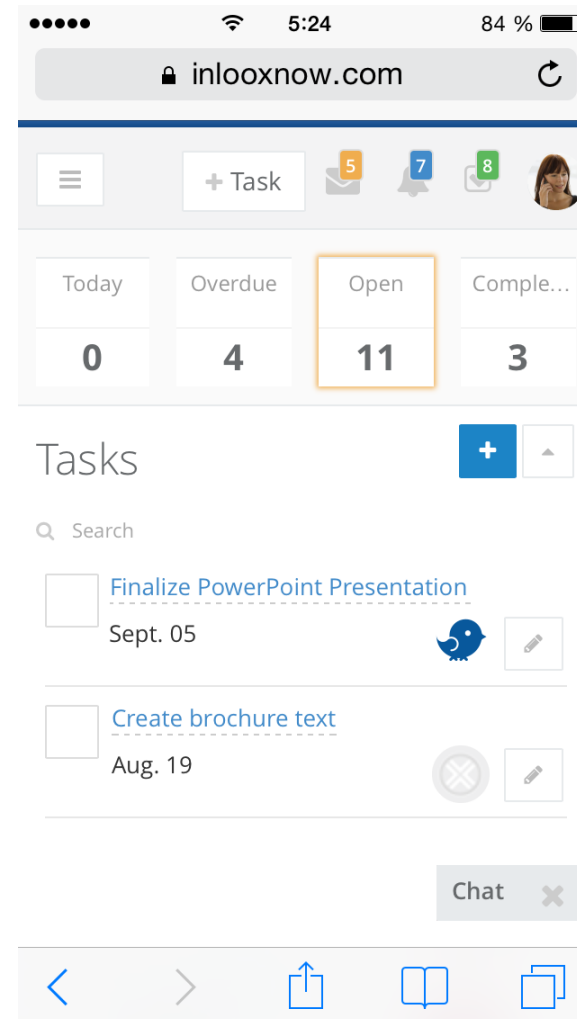

Ease-of-use & Flexibility

Simple vs. Advanced Mode
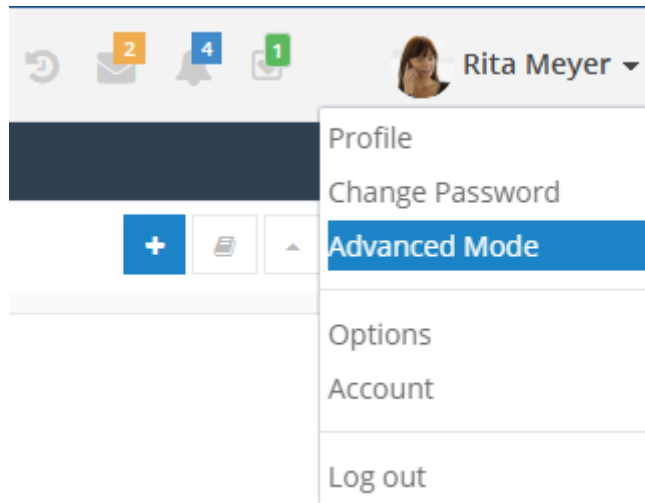

Some team members only need the self-explanatory task management, while others need detailed insights of data and performance. InLoox PM Web App enables both, all on one platform. Quickly switch from simple to advanced mode to get all the detailed data you need.

Mobile-Friendly

You are mobile? So is InLoox Web App and your projects. It is optimized for tablets and smartphones, ensuring that accessing your project data wherever you are on whichever device is actually possible.

Successful Projects Start with InLoox

More than 3,500 customers and 50,000 users on five continents rely on InLoox. Corporate customers ranging from small and mid-sized companies to large enterprises use it as their standard software. More and more companies of all sizes and market sectors find InLoox to be their go-to, efficient solution for project management.
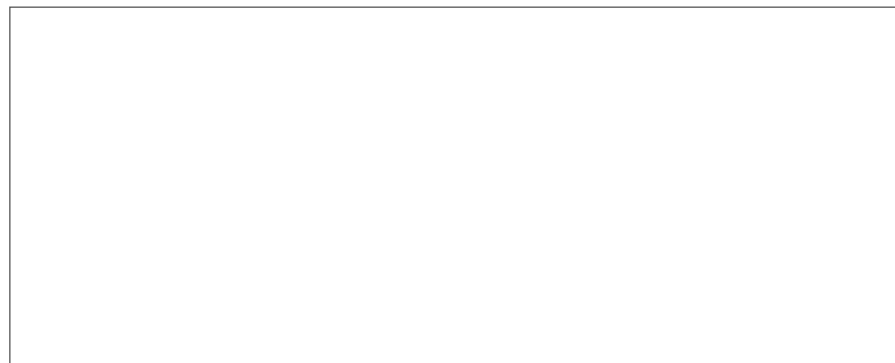

Some companies, that use InLoox:
