

New Features in Version 10

Flexible, mobile and more networked.
The new way to work with InLoox.

The more dynamic the work environment, the more important it is to have project management software that supports you in every situation. With InLoox 10, your tasks, project data and status overviews are always at hand and reliably available thanks to the new offline availability for InLoox PM and InLoox now! You are completely flexible and can work productively even in places without an Internet connection.

Are you often at your customers' premises, in the production hall, do you work on the move, or in places with limited Internet access? Then you can now have your InLoox with you on your smartphone. With the new InLoox Mobile Apps, you can view your most important project data, report tasks and upload documents or images anywhere.

We know: Your work day is already complex enough. That is why we have integrated and adapted InLoox 10 more deeply into your accustomed environment. With the convenient registration for Office 365 users, the fast booking of Outlook elements and the simple connection to SharePoint, SharePoint Online and 2016 or OneDrive, you are networked with all applications that you need for your efficient project work.

Start your free, fully-featured 30-day trial of our latest product generation today. You will never want to work without InLoox again:

Flexibility

Offline availability for InLoox for Outlook

Tools for Working with InLoox now

-  **Options**
Change language, display and system settings.
-  **Start setup assistant**
Connect your InLoox now client with InLoox PM Workgroup/Enterprise Server or InLoox now.
-  **Export InLoox now data**
Transfer your existing project data to a new InLoox PM Workgroup/Enterprise Server.
-  **Work offline**
With offline availability, you can manage your projects without an InLoox now Enterprise server connection.

Access your project data anytime, anywhere - whether you're online or not. InLoox 10 offers this for both InLoox PM for Outlook and InLoox now! for Outlook. With the new offline availability, you can complete your project work regardless of the quality of the Internet connection. As soon as InLoox has established a connection to your InLoox database or to InLoox now! again, the data will be updated.

InLoox Mobile Apps

The InLoox Mobile Apps for iOS and Android are the ideal companion for location-independent project work. You receive real-time data on your projects even when you are on the move. Project members can easily create new tasks, complete tasks or upload documents and images. This makes it easy to give feedback and the prompt entry of data is more convenient than ever.

Available from July 2018 for InLoox PM Enterprise Server and InLoox now!

Integration

InLoox one-click ribbon in Outlook e-mails

With the new InLoox ribbon in Microsoft Outlook e-mails, you can now quickly and easily book e-mails for your project work or day-to-day business. You can immediately create tasks or documents, or even create a project from an e-mail - all with just one click. You work your way through your inbox in no time and get one step closer to reaching your goal of a tidy inbox.

SharePoint and OneDrive connection

We have made your document management even more convenient with InLoox. With InLoox 10 you can integrate Microsoft SharePoint 2016 or SharePoint Online as well as Microsoft OneDrive for Business. The big advantage: You can map the familiar document structure directly in InLoox. As soon as documents or folders are updated, InLoox synchronizes the changes.

Easy logon with Microsoft Office 365

InLoox now! users with a Microsoft Office 365 account log on to InLoox now! with the same authentication with just one click. This saves time and supports your networked work with InLoox now! and your other Microsoft applications.

Document management

Edit documents directly in InLoox Web App

Good news for InLoox Web App users: downloading, editing, uploading is a thing of the past. With InLoox 10 Web App you simply open the Word or Excel document online in your browser, edit it and click on Save. Voilà-Your team can continue working with the updated document.

Link documents to budgets and budget items

The list of the individual tasks must be transmitted to the customer for invoicing? No problem. Simply attach the document to the budget to be settled and the time-consuming search and enquiry of the accounting department is over.

Preview URLs in InLoox for Outlook

You have created a collection of inspirations for the relaunch of your website? Or researched several online articles for your market analysis? Then store the Internet links in the document area of your project. In the preview area you and your colleagues can scroll and navigate through the pages without having to leave InLoox for Outlook.

Usability

Working with InLoox should be as intuitive as possible for you. With InLoox 10, we have placed great emphasis on improving user-friendliness. We have also improved the look and feel and given InLoox 10 a modern design.

Improved filter function

Zusätzliche Filter-Optionen in den Tabellen-Ansichten im Excel-Stil erleichtern das Erstellen von individuellen Ansichten.

Add tasks to the project plan with drag-and-drop ease

Multiselect allows you to quickly drag and drop several tasks into the gantt-chart at once.

New search function in the dialog window

With the new search function you can quickly find the right customer for the project assignment and the correct document for a task.

Hours of all tasks in the kanban columns

In the kanban board of your project, you can now immediately see the estimated effort of all tasks in a column without having to consult the InLoox dashboard.

Create custom fields according to your rules

If you need the field *risk* in the planning for all projects of your *product development department*, you can now define this in the options using a rule.

Switching between InLoox now! accounts

If you are an InLoox now! customer with several different accounts, you can now switch conveniently between these accounts.

Security of your data

Create database backups easily

Tools for Working with InLoox PM

-  **Options**
Change language, display and system settings.
-  **Start setup assistant**
Connect your InLoox PM client with InLoox PM Workgroup/Enterprise Server or InLoox now.
-  **Create InLoox now! account**
Transfer your existing project data to a new InLoox now! account.
-  **Export InLoox PM data**
Transfer your existing project data to a new InLoox PM Workgroup/Enterprise Server.
-  **Work offline**
With offline availability, you can manage your projects without an InLoox PM Enterprise server connection.

With InLoox 10 you can create your own database backup from your InLoox PM project database or from your InLoox now! account and save it locally on your server. You not only have control over the security of your data, but can also act independently of the availability of the InLoox support.

Migration from InLoox now! to InLoox PM

The screenshot shows the InLoox software interface. On the left, there is a section titled "InLoox now" with the text "Export InLoox now data" and an icon of two yellow cylinders. On the right, a dialog box titled "Please enter connection information" is open. It contains several input fields: a dropdown menu set to "Microsoft SQL Server", a text field with "server\SQLEXPRESS", a text field with "companyXY", a radio button for "Integrated security" (which is selected), a radio button for "Username/password", and a text field for "Additional parameters". There are information icons (i) next to the dropdown, the server name field, the company name field, and the additional parameters field. A "Next" button is located at the bottom right of the dialog box.

What has already been possible for InLoox PM customers is now also an option for InLoox now! customers: you can easily migrate your data from one InLoox product family to another. From now on, you can migrate your project data from the InLoox now! cloud to your own local server infrastructure when you switch from InLoox now! to InLoox PM. Best of all, you can also migrate your documents stored in InLoox and do not have to link them back to your InLoox elements.

New Features in Version 10

Successful projects start with InLoox

More than 6,000 customers and 55,000 users on five continents rely on InLoox and use it as their standard software. Companies of all sizes and industries find an efficient solution for their project and team management in InLoox and provide their employees with a practical tool for the challenges of the digitized working environment in a fast paced world.
