Guidelines

Best practices and guidelines for the recommended system configuration.

This data is based on actual customer experiences and installations.

Scenario 1 100 InLoox Users

Estimated database size (does not include file storage) :

Component	Growth
Database size	Annual growth per year approx. 0.5 to 2 GB. Equals 5 to 20 MB per users per year.

Database Server (Microsoft SQL Server):

Component	Recommended
Processor	Quad-core x64 architecture 2 GHz CPU or higher such as AMD Opteron or Intel Xeon systems.
Memory	8 GB RAM or more.
Hard disk	SAS RAID 5 or RAID 10 hard disk array.

Web Server (Microsoft Internet Information Server):

Component	Recommended
Processor	Quad-core x64 architecture 2 GHz CPU or higher such as AMD Opteron or Intel Xeon systems.
Memory	8 GB RAM or more.
Hard disk	SAS RAID 5 or RAID 10 hard disk array. RAID is not required when using redundant servers.

Scenario 2 200 InLoox Users

Estimated database size (does not include file storage) :

Component	Growth
Database size	Annual growth per year approx. 1 to 4 GB. Equals 5 to 20 MB per users per year.

Database Server (Microsoft SQL Server):

Component	Recommended
Processor	Quad-core x64 architecture 2 GHz CPU or higher such as AMD Opteron or Intel Xeon systems.
Memory	16 GB RAM or more.
Hard disk	SAS RAID 5 or RAID 10 hard disk array.

Web Server (Microsoft Internet Information Server):

Component	Recommended
Processor	Quad-core x64 architecture 2 GHz CPU or higher such as AMD Opteron or Intel Xeon systems.
Memory	8 GB RAM or more.
Hard disk	SAS RAID 5 or RAID 10 hard disk array. RAID is not required when using redundant servers.
